

TRIAD IR AIMING LASER

SPECIFICATIONS

BATTERY TYPE/LIFE:	1 CR123/4 HOURS
WINDAGE & ELEVATION:	DIALS, ¼ MOA
WEIGHT:	9.7 OZ (275 G)
DIMENSIONS:	3.5" L X 2.5" W X 1.75" H
ENVIRONMENTAL:	MIL-810G & ESD COMPLIANT

FEATURES

- » **COVERT EYE SAFE IR AIMING LASER**
- » **MIL STANDARD 810G COMPLIANT**
- » **LOW PROFILE WINDAGE AND ELEVATION DIALS**
- » **INCLUDES REMOTE CABLE PRESSURE PAD**

The **Triad™** combines both a covert IR aiming laser and unique rear focusing IR illuminator for tactical night vision operations. Also built into the Triad's diode cone housing is the very latest advanced generation Green aiming laser for dim light or daytime targeting applications.

Specifically designed for the individual or crew served weapon, the aiming lasers and illuminator are controlled with a single set of low-profile windage and elevation dials that greatly simplify bore-sighting and adjustment manipulations. Infrared "modes" offer both high and low power settings for optimized training or tactical field use. All three lighting sources can be operated individually or in various combinations. Activation is controlled with either the included remote cable pressure pad or the built-in single tap button located on top of the housing body.

Despite all of its many advanced features the Triad™ is remarkably compact and maintains a low profile when weapon mounted. The ruggedized design of the Triad™ ensures continued operation when submerged or when subjected to repeated heavy recoil. The system also includes an integral Picatinny rail for additional accessories as well as an adjustable quick detach throw lever mount with lock to prevent accidental detachment in the field.
