

MINI BNVD AAA-E 18mm

SPECIFICATIONS

POWER SOURCE:	(1) AAA-SIZE BATTERY
FOCUS RANGE:	9.8" TO INFINITY
OPERATION TIME:	8+ HRS, 1 ALKALINE BATTERY 16+ HRS, 1 LITHIUM BATTERY
MAGNIFICATION:	ONE POWER (1X)
FIELD OF VIEW:	40°
DIOPTER ADJUSTMENT:	-6 TO +2
EYE RELIEF:	25MM
WEIGHT (W/O BATTERY):	SUB 415 G (14.6 OZ)
DIMENSIONS:	4.25" X 3.8" X 3.3"

FEATURES

- » LENSES OPTIMIZED FOR WHITE PHOSPHOR
- » 16+ HOUR BATTERY LIFE WITH LITHIUM AAA BATTERY
- » TACTICAL MONOCULAR CUTOFF
- » REMOVABLE BATTERY COMPARTMENT FOR WEIGHT SAVINGS
- » POWER OFF THE UNIT WHEN IN AN UPRIGHT POSITION AND POWER ON WHEN FLIPPED DOWN

Night Vision Devices is pleased to announce the **NEW MINI BNVD AAA 18mm, Dual Tube Night Vision Goggle with Single Gain Control**. With a system weight of SUB 415 Grams, the new MINI BNVDs are the lightest fully functional dual tube goggles in the world, which utilize 18mm Gen 2 or 3 Image Intensifiers and include important features such as a fully focusing eyepiece with a diopter focus range of +2 to -6, a close focus range on 9.8 inches (24.8 cm) and a focusable IR Illuminator.

The MINI BNVD AAA runs on one "AAA" Battery which powers the system for 16+ hours. This "AAA" battery is housed within a detachable battery compartment which can be removed for weight savings when using the system in conjunction with the included battery pack. This pack holds three "AA" batteries, which allows the MINI BNVD to be run for a continuous 60+ hours.

The MINI BNVD incorporates new high performance optics that are not only much lighter, but also offer higher performance than standard optics. Currently the AN/PVS-14 and most other night vision systems, use optics which were only designed for green (P43) phosphor image tubes. However these new optics were designed specifically to be optimized for both White (P45) and Green (P43) image tubes.

The MINI BNVD also features a "Tactical Monocular Cutoff" which turns off power to each channel of the monocular whenever a channel is rotated up out of the users line of sight. This eliminates stray light from illuminating the users helmet, which would reveal the user to anyone else on the battlefield. The MINI BNVD also has an automatic system power cutoff whenever the system is flipped up into the helmet mounted stow position, and then powers back on when it is flipped back down. This feature can also be disabled by the end user if needed. The MINI BNVD is submersible to 66 feet (20 meters) for up to 3 hours.

HELMET MOUNT OPTIONS

The Mini BNVD can be used as a monocular by choosing which side you want to use as your night vision eye and rotate the other side/arm of the binocular up and out of the way. The arm that is rotated up will automatically turn off and will power back on when rotated down. Each arm is tight enough so that the rotated arm will not fall down, but stay in its user adjusted position. To use as a binocular, rotate both sides down or when night vision is no longer needed, shut off and rotate both sides up and out of the way.

Never before could a binocular remain mounted when sighting with a rifle. The Mini BNVD does not need to be removed. Simply rotate one monocular of the Mini BNVD up and out of the way, so that the user can view through the dayscope & night vision weapon sight.

MINI BNVD WITH WEAPON SIGHT

STANDARD ACCESSORIES

Soft Carry Case, Demist Shields, Sacrificial Windows, IR Spot/Flood Lens, Dovetail Mounting Adapter, Lens Tissue, (2) AAA Batteries, Operator's Manual & Card, Neck Cord, Eyecups, Retaining Lens Covers and Battery pack for 50-60 hours of continual use for extended missions.

OPTIONAL ACCESSORIES

3X Magnifier, G24 Helmet Mount, Shuttered Eyeguards, Camera Adapter.
