

# AN/PVS-22 NIGHT VISION WEAPON SIGHT

The **Knight Vision® UNS Clip-on Weapon Sight**, Type Classified as a MIL Spec AN/PVS-22, adds light intensification night vision to most rifles and day scopes. This product uses the latest high performance Gen III intensifier tube in a proven design, where the catadioptric lens provides high performance light collection with an effective f/1.2 in a light weight optic. The UNS is appropriate for front line rifles such as the M4 Carbine, M16A2/A4, M249, M14, and daysights with magnification up to 10X. The Knight Vision patented technology makes the product universal and assures the accuracy of your range-tested day scope boresight will not be degraded. When the UNS is added in front, your existing optic, eye relief, and cheek weld are undisturbed.

## FEATURES
