

# MK II THERMAL WEAPON SIGHT

## FEATURES

- »»» **THREE YEAR WARRANTY**
- »»» **MADE IN THE USA**
- »»» **640X480 RESOLUTION AND 60HZ FRAME RATE**
- »»» **ETR – ENHANCED TARGETING MODE**
- »»» **DFC – DIGITAL FOCUS CONTROL**
- »»» **STAND ALONE OR CLIP ON THERMAL WEAPON SIGHT**

The **IR Hunter™ Mk II** features the ability to act as either a stand-alone thermal weapon sight or a clip on thermal weapon sight. With a 640x480 resolution and 60Hz frame rate, its processing power gives you a larger, clearer image than any thermal scope on the market with sharp detailed symbols and reticles. The upgraded MicroIR Sensor features an impressive 12µm Micron technology, which uses less power than the previous 17µm systems.

The IR Hunter™ MK II contains all the features and ergonomics you have wanted and combined them into a sleek system made to fit securely onto your rifle. The IR Hunter's Turret Knob controls are located where you would expect them to be; they are modeled after your day optics. Other thermal systems' controls take time to learn; but in the dark, down-range, or under fire, your natural instincts will appreciate the IR Hunter's similarity to your day sight. The IR Hunter™ MK II uses precision sighting reticles, which scale as you zoom; just as a first focal plane reticle does on a high end rifle scope. This system features an image capture and review capability. Available in 19mm or 35mm lenses.

MODEL:	IR HUNTER MK II 19MM	IR HUNTER MK II 35MM
RESOLUTION:	640X480	640X480
WEIGHT (WITH BATTERIES):	29 OZ (825 G)	35 OZ (990 G)
