

# CNVD-T3 THERMAL WEAPON SIGHT

The **NVD-CNVD-T3** is the smallest, lightest and highest performing long range, uncooled thermal clip on weaponsight we are aware of. This system distinguishes itself with the ability to be used as both a standalone long range thermal weaponsight, with its own digital internal reticule aiming system, and with the ability to be used as a clip on device in front of bore sighted day optics.

With a man sized detection range of an incredible 2465 meters this sight outperforms all but the highest performance long range sniper rifles. The NVD-CNVD-T3 also features a 2X digital zoom as well as the capability to capture, store and download images to a PC.

The T3 uses two easy to obtain CR-123 batteries, which will power the unit for a continuous 4.5 hours, and yet weighs only a little over two pounds. This is less than most Night Vision weapon sights, which do not even have half of the detection range of the T3.

## SPECIFICATIONS

POWER SOURCE:	<b>(2) 3-VOLT LITHIUM</b>
BATTERY LIFE:	<b>4.5 HOURS</b>
RECOGNITION RANGE:	<b>2465 M</b>
RESOLUTION:	<b>320X240</b>
FRAME RATE:	<b>60 HZ</b>
MAGNIFICATION:	<b>1X WITH 2X DIGITAL ZOOM</b>
FIELD OF VIEW:	<b>6° DIAGONAL</b>
FOCUS RANGE:	<b>4M TO INFINITY</b>
WEIGHT (W. BATTERIES):	<b>36 OZ (1020 G)</b>
DIMENSIONS:	<b>7.2" X 4" X 4.3"</b>

## FEATURES

- » **ONE YEAR WARRANTY**
- » **FUNCTIONS IN SUNLIGHT OR TOTAL DARKNESS**
- » **2X DIGITAL ZOOM CAPABILITY**
- » **PENETRATES MOST WEATHER CONDITIONS**
- » **WHITE HOT OR BLACK HOT**
- » **TARGET RECOGNITION UP TO 2465 METERS**
- » **CAPTURES AND STORES IMAGES**
- » **POWERFUL, COMPACT AND PORTABLE**

## STANDARD ACCESSORIES

Soft Carry Case, 123 Batteries (2), Operators Manual, Operator's Card, Lens Paper, Demist Shield, Video Output Cables, Lens Brush, Optical Lens Cleaner Solution, and Light Shroud.
