

# PVS-7-6X NIGHT VISION GOGGLE

## SPECIFICATIONS

OBJECTIVE LENS RESOLUTION:	165MM
POWER SOURCE/LIFE:	(2) AA-SIZE BATTERIES/40+ HRS
FOCUS RANGE:	33' TO INFINITY
MAGNIFICATION:	SIX POWER (6X)
FIELD OF VIEW:	8°
DIOPTER ADJUSTMENT:	-4 TO +4
WEIGHT:	2.2 LBS
DIMENSIONS:	13.25"L X 6"W X 3"H

## FEATURES

- » TEN YEAR WARRANTY
- » (2) AA BATTERY USAGE
- » HIGH LIGHT CUTOFF
- » IR LED INDICATOR
- » LIGHTWEIGHT, RUGGED AND WATER-RESISTANT

The Night Vision Devices **PVS-7 6X Night Vision Goggles** is a dedicated six power goggle for long range observation and surveillance. This unit uses the AN/PVS-7D body assembly in conjunction with a high quality six power astronomy grade catadioptric objective lens. The NVD-7-6X can also be supplied with a camera adapter for high quality night vision imagery.

Power is supplied via two AA batteries for a run time of up to 40 hours of continuous use. Because the unit is based upon the popular AN/PVS-7B & D night vision goggle, repair, maintenance and supportability are greatly enhanced and the image intensifier can be upgraded at any time with a drop-in replacement MX10130 image tube. A built-in high light cutoff turns power off to the unit if it is left on during daylight hours.

Extremely lightweight, rugged and water-resistant, the NVD-7-6X can be configured with a variety of image intensifier tubes. Produced with high-quality, all glass optics, the 6X lens is designed specifically for optimal light transference with night vision devices.

## STANDARD ACCESSORIES

Carrying Case, Eyecups, 2 AA Batteries, Operator's Manual, and Lens Tissue.
