

WAKE2 NIGHT VISION MONOCULAR

SPECIFICATIONS

POWER SOURCE/LIFE:	(1) CR123 BATTERY/60 HRS
WATER INTRUSION:	MEETS IPX4 RATING
MAGNIFICATION:	2.5X
DIOPTER ADJUSTMENT:	+4 TO -4
LENS SYSTEM:	59MM F/1.2
EYE RELIEF:	10MM
OBJECTIVE LENS:	40MM
DETECTION RANGE:	275 YDS
FOCUS RANGE:	1 YD TO INFINITY
WEIGHT:	12 OZ (340 G) W/O BATTERIES
DIMENSIONS:	7.1" X 3.15" X 1.97"
FIELD OF VIEW AT DISTANCE 200 YDS:	162 FT

FEATURES

- » **TWO YEAR WARRANTY**
- » **LIGHTWEIGHT**
- » **WIDE FIELD OF VIEW**
- » **FULLY MULTICOATED OPTICS**
- » **BUILT-IN 1/4" TRIPOD SOCKET**
- » **60 HOUR BATTERY LIFE**
- » **LONG RANGE VIEWING UP TO 250 YDS**

The **NVD-Wake2** is a Gen 1 night vision monocular. Despite advances in the digital night vision field, the Gen 1 products still have their own niche. The inexpensive Gen 1 product remains a choice for many budget conscious customers. Also it is a preferred selection for a user who prefers a longer battery life, higher level of sensitivity and better resolution, which still remain the competitive advantages of the Gen 1 devices.

The NVD-Wake2 monocular features a fully multi-coated optic that provides a clear and clean image. It operates with a minimum battery life of 60 hours. The NVD-Wake2's user friendly design makes it perfect for observational applications. The lens focusing ring provides a fast, precise and efficient way to quickly refocus the device. It also features a slide-in groove, which is designated to firmly hold the lens cap to prevent misplacing the lens cap.

The NVD-Wake2 features a very wide field of view and provides long range viewing. It also has a built-in infrared illuminator and a fixed 2.5x magnification.

STANDARD ACCESSORIES

Lens Cap, Protective Carrying Case, User Manual, Lens Cleaning Tissue.
