» RED MARKING LASER

» RUGGED, SHOCK-RESISTANT & WEATHER RESISTANT DESIGN

» TACTICAL ADVANTAGE IN THE PALM OF YOUR HAND

» 4-BUTTON OPERATION: POWER, POLARITY, CONTINUOUS ZOOM AND LCD BRIGHTNESS/LASER ACTIVATION

Hardened for law enforcement and surveillance, the **FLIR® LS-Series Thermal Night Vision Monocular** is designed for everyday use. Rather than rush on the scene with a flashlight that instantly gives away your position and only illuminates your immediate area, FLIR® LS thermal imaging camera is just as portable, handy and exponentially more effective. At only 12 ounces and 7-inches long, FLIR® LS is destined to become an essential tactical advantage. No matter how clever a suspect may be, they can't hide their heat. You can see through smoke, dust, light fog, even foliage and camouflage are powerless. Take away every hiding spot with the LS Series. There are two models under the LS-Series: LS-X (336x256 - up to 4X E-zoom) and LS-XR (640x512 - up to 8X E-zoom). The LS-Series is available through GSA Advantage.
