INTERNATIONAL SALES

The **NVD MICRO Monocular** is an ultra small, American Made, image intensified night vision device that truly brings the term "Pocketscope" into definition. Yet the MICRO is much more than just a pocketscope - it can also be head or helmet mounted, weapon mounted, or mounted to a camera.

The MICRO's small profile truly means that it will fit into a pocket for the ultimate night surveillance device, and its easily interchangeable CCTV objective lens means that when conditions warrant, a higher magnification objective can be used for longer range observation. The MICRO camera adapter (optional) also allows it to quickly and easily be attached to a camcorder or digital camera for recording night time pictures and videos.

STANDARD ACCESSORIES

Soft Carry Case, Operator's Card, Lens Tissue, Lens Cap, Eyecup and 123 Battery.

OPTIONAL ACCESSORIES

Weapon Mount and J Arm Head/Helmet Adapter.
