

# NVD-321 NIGHT VISION BINOCULAR

The **NVD-321 is a dual tube Night Vision Binocular** which offers distinct advantages over single tube goggles and monoculars. These include true stereoscopic vision, reduced eye fatigue, and improved depth perception. The NVD-321 is highly configurable with a full range of optional accessories to increase versatility, including multiple head and helmet mounting options as well as optional lenses for increased range and surveillance capabilities.
